Journal of Alloys and Compounds 229 (1995) 289–291

Journal of ALLOYS AND COMPOUNDS

Subject Index of Volume 229

Alkali chloride
molar volume variation and ionic conduction in molten $ErCl_3$–NaCl and $ErCl_3$–KCl systems 274
Alkali compounds
quaternary chalcogenides containing a rare earth and an alkali- or alkaline-earth metal 206
Alkali metal
synthesis and structure of new metal hydrides 1
Alkaline-earth compounds
quaternary chalcogenides containing a rare earth and an alkali- or alkaline-earth metal 206
Alkaline-earth metal
synthesis and structure of new metal hydrides 1

Chalcogenides
chalcogenide misfit layer compounds 144
Chemistry
chemistry and properties of novel niobium cluster compounds 93
Chromium phosphide carbide
the chromium phosphide carbide Cr_8P_6C 233
Copper oxycarbonates
crystal chemistry of superconducting copper oxycarbonates 134
Crystal chemistry
on the crystal chemistry of oxomercurates(II) 107
crystal chemistry of superconducting copper oxycarbonates 134
Crystal structure
second moment scaling, metallic and covalent structure rationalization and electron counting rules 66
the chromium phosphide carbide Cr_8P_6C 233
the rare earth transition metal phosphide oxides LnFePO, LnRuPO and LnCoPO with ZrCuSiAs type structure 238
synthesis and structure characteristics of the new ternary boride $(V_{1-x}Nb_x)_2B_3$ 243

Diffusion
multiphase reaction diffusion in transition metal–carbon and transition metal–nitrogen systems 80
hydrogen in the A15 compounds Nb_3Sn and Nb_3Al: a nuclear magnetic resonance study 248
DO19 structure
characterization of UPd_3 stabilized in the DO19 structure 262

Early transition metals
exploring the metal-rich chemistry of the early transition elements 40
Electrical transport phenomena
analysis of the Verwey transition in magnetite 24
Electrocatalytic activity
electrochemical and surface properties of the $Zr(V_{0.2}Mn_{0.2}Ni_{0.6})_{2.4}$ alloy electrode 268
Electrochemical synthesis
the electrochemical synthesis of telluride Zintl anions 175
Electrochemistry
electrochemical and surface properties of the $Zr(V_{0.2}Mn_{0.2}Ni_{0.6})_{2.4}$ alloy electrode 268
Electron counting rules
second moment scaling, metallic and covalent structure rationalization and electron counting rules 66
Electron probe microanalysis
multiphase reaction diffusion in transition metal–carbon and transition metal–nitrogen systems 80
Electronic effects
recent investigations on the $(Me_6L_{18})^{n-}$ unit based halides and oxyhalides (Me = Nb, Ta and L = Cl, Br, O) with rare earths as countercations: electronic and steric effects 123
Electronic structure
Ruddlesden–Popper zirconium sulfides—a novel preparation method and characterization of electronic structure 216
Erbium chloride
molar volume variation and ionic conduction in molte $ErCl_3$–NaCl and $ErCl_3$–KCl systems 274

Fluoroperoxomolybdate
studies on peroxomolybdates XVIII. Crystal structure of ammonium μ-fluoro-μ-oxo-bis[oxodiperoxomolybdate(VI)]–water(2/1), $(NH_4)_3[FO\{MoO(O_2)_2\}_2]\cdot\frac{1}{2}H_2O$, a dibridged peroxodimolybdate 227

Halide clusters
interstitially-stabilized cluster-based halides of the early transition metals 10
Halides
recent investigations on the $(Me_6L_{18})^{n-}$ unit based halides and oxyhalides (Me = Nb, Ta and L = Cl, Br, O) with rare earths as countercations: electronic and steric effects 123
Heavy fermion
superconductivity and spin fluctuations in doped $CeIr_5$ 254
Heavy fermions
characterization of UPd_3 stabilized in the DO19 structure 262
Hydrogen
hydrogen in the A15 compounds Nb_3Sn and Nb_3Al: a nuclear magnetic resonance study 248

Interstitial carbides
the chromium phosphide carbide Cr_8P_6C 233

Low temperature
superconductivity and spin fluctuations in doped $CeIr_5$ 254
Luminescence
solid state chemistry and luminescence of X-ray phosphors 54

Magnetic properties
chalcogenide misfit layer compounds 144

Elsevier Science S.A.

effects of Si substitution on the magnetic properties of R_2Fe_{17} compounds with R ≡ Y and Tm 257
Magnetic susceptibility
on new rare-earth iridium aluminides LnIrAl 265
Magnetite
analysis of the Verwey transition in magnetite 24
Mechanical alloying
preparation of nanocrystalline intermetallic compounds WSi_2 and $MoSi_2$ by mechanical alloying 280
Melt
molar volume variation and ionic conduction in molten $ErCl_3$–NaCl and $ErCl_3$–KCl systems 274
Metal hydrides
synthesis and structure of new metal hydrides 1
Metallic behaviour
synthesis and structure of new metal hydrides 1
Metal-rich chemistry
exploring the metal-rich chemistry of the early transition elements 40
Metal-rich compounds
from a molecular view on solids to molecules in solids 158
Misfit phases
chalcogenide misfit layer compounds 144
Molar conductivity
molar volume variation and ionic conduction in molten $ErCl_3$–NaCl and $ErCl_3$–KCl systems 274
Molecules
from a molecular view on solids to molecules in solids 158
$MoSi_2$
preparation of nanocrystalline intermetallic compounds WSi_2 and $MoSi_2$ by mechanical alloying 280

Niobium cluster compounds
chemistry and properties of novel niobium cluster compounds 93
Nuclear magnetic resonance
hydrogen in the A15 compounds Nb_3Sn and Nb_3Al: a nuclear magnetic resonance study 248

Oxomercurates
on the crystal chemistry of oxomercurates(II) 107
Oxyhalides
recent investigations on the $(Me_6L_{18})^{n-}$ unit based halides and oxyhalides (Me = Nb, Ta and L = Cl, Br, O) with rare earths as countercations: electronic and steric effects 123

Phase diagrams
the scandium–rhodium phase diagram 283
Phase equilibria
multiphase reaction diffusion in transition metal–carbon and transition metal–nitrogen systems 80

Quaternary chalcogenides
quaternary chalcogenides containing a rare earth and an alkali- or alkaline-earth metal 206

Rare earth compounds
quaternary chalcogenides containing a rare earth and an alkali- or alkaline-earth metal 206
Rare-earth iridium aluminides
on new rare-earth iridium aluminides LnIrAl 265
Rare-earth iron compounds
effects of Si substitution on the magnetic properties of R_2Fe_{17} compounds with R ≡ Y and Tm 257
Rare-earth metals
interstitially-stabilized cluster-based halides of the early transition metals 10
Rare earth metals
the rare earth transition metal phosphide oxides LnFePO, LnRuPO and LnCoPO with ZrCuSiAs type structure 238
Rhodium
the scandium–rhodium phase diagram 283
Ruddlesden–Popper zirconium sulfides
Ruddlesden–Popper zirconium sulfides—a novel preparation method and characterization of electronic structure 216

Scandium
the scandium–rhodium phase diagram 283
Second moment scaling
second moment scaling, metallic and covalent structure rationalization and electron counting rules 66
Second order phase transitions
multiphase reaction diffusion in transition metal–carbon and transition metal–nitrogen systems 80
Silicon substitution
effects of Si substitution on the magnetic properties of R_2Fe_{17} compounds with R ≡ Y and Tm 257
Solid state chemistry
solid state chemistry and luminescence of X-ray phosphors 54
Solids
from a molecular view on solids to molecules in solids 158
Spin fluctuations
superconductivity and spin fluctuations in doped $CeIr_5$ 254
Structure
synthesis and structure of new metal hydrides 1
Structures
interstitially-stabilized cluster-based halides of the early transition metals 10
Superconductivity
crystal chemistry of superconducting copper oxycarbonates 134
chalcogenide misfit layer compounds 144
from a molecular view on solids to molecules in solids 158
Surface properties
electrochemical and surface properties of the $Zr(V_{0.2}Mn_{0.2}Ni_{0.6})_{2.4}$ alloy electrode 268
Synthesis
synthesis and structure characteristics of the new ternary boride $(V_{1-x}Nb_x)_2B_3$ 243

Telluride
the electrochemical synthesis of telluride Zintl anions 175
Ternary boride
synthesis and structure characteristics of the new ternary boride $(V_{1-x}Nb_x)_2B_3$ 243
Thermodynamics
analysis of the Verwey transition in magnetite 24

Transition metal phosphide oxides
the rare earth transition metal phosphide oxides LnFePO, LnRuPO and LnCoPO with ZrCuSiAs type structure 238
Transition metals
interstitially-stabilized cluster-based halides of the early transition metals 10
Transport properties
chalcogenide misfit layer compounds 144

Vanadium niobium boride
synthesis and structure characteristics of the new ternary boride $(V_{1-x}Nb_x)_2B_3$ 243
Verwey transition
analysis of the Verwey transition in magnetite 24

WSi_2
preparation of nanocrystalline intermetallic compounds WSi_2 and $MoSi_2$ by mechanical alloying 280

X-ray phosphors
solid state chemistry and luminescence of X-ray phosphors 54
X-ray structure
studies on peroxomolybdates XVIII. Crystal structure of ammonium μ-fluoro-μ-oxo-bis[oxodiperoxomolybdate(VI)]–water(2/1), $(NH_4)_3[FO\{MoO(O_2)_2\}_2]\cdot\frac{1}{2}H_2O$, a dibridged peroxodimolybdate 227

Zintl anions
the electrochemical synthesis of telluride Zintl anions 175
$Zr(V_{0.2}Mn_{0.2}Ni_{0.6})_{2.4}$ alloy
electrochemical and surface properties of the $Zr(V_{0.2}Mn_{0.2}Ni_{0.6})_{2.4}$ alloy electrode 268
